ACTIVITY
binding sites, nucleotide sequence, protein interaction, database, functional DNA, 687
Arabidopsis thaliana
AraSet, 887

BAliBASE
multiple alignments, alignment database, benchmark, program evaluation, 87
Bayesian interference
biopolymer models, dynamic programming, sequence segmentation, sequence alignment, 38
bDNA
ProbeDesigner, bDNA, NSH interactions, 348
B-DNA-VIDEO
transcription factors, binding sites, conformal properties, physicochemical properties, 654
Biopolymer models
Bayesian statistics, dynamic programming, sequence segmentation, sequence alignment, 38
Biopolymers
bipolymer database, markup language, 339
bioWidgets
genomics, JavaBean components, visualization, data interaction, 837
BLAST PRINTS
sequence similarity, sequence analysis, 523

Calign
sequence alignment, cDNA, genomic DNA, gap penalties, algorithm, 298
Calmodulin
binding protein, kinesin, myosin,plant motors, KCBP, sequence analysis, 1055
Carbohydrate sequence
SWEET, 767
cDNA clones
IMAGEne, 965
Cell modelling
E-CELL, whole-cell simulation, 72
Cellular metabolism
regulation, simulation, Dbsolve, biochemical networks, 749
Cellular regulation
cellular metabolism, simulation, Dbsolve, mathematical models, biochemical networks, 749
Chromosome irradiation
mammalian cells, Monte Carlo simulation, radiation breaking DNA, polymer physics, chromosome model, 957
Circular permutations
dynamic programming, proteins, algorithm, 930
Client/server system
ORBIT, interfaces, bioinformatics tools, 847
ComAlign
multiple alignments, improved alignment, simulated data, 122
Complete genomes
DNA folding, protein structure, bp oscillations, yeast, bacteria, archaea, DNA supercoiling, sequence periodicities, 187
REPuter, complete genomes, repeats, palindrones, 426
Entrez, genome sequences, viruses, bacteria, yeast, 536
Consensus sequences
neural network, consensus sequences, DNA sequences, accuracy, network topology, 723
Consensus secondary structure
RNA sequences, unaligned sequences, pseudoknots, tRNA, algorithm, prediction, 785
CoDe
decision trees, machine learning, 1039
CoPE
epidemiologists, pedigree, drawing, 345
CORBA
genome maps, IDL specification, standard interface, 157
SRS, object server, interface, 333
CRAWview
gene families, visualization, EST clusters, polymorphism, 376

DIP
protein evolution, homonyms, synonyms, interfaces database, secondary structure, molecular mimicry, 832
Data interaction
bioWidgets, genomics, JavaBean components, visualization, AnnotView, BlastView and AlignView, 837
Database alignments
PIR-ALN, protein sequences, sequence alignments, 382
Database analyses
Protein Data Bank, database management, 807
Database comparisons
RAPID, PHAT,SPLAT, vector contamination, EMBL databases, sequence database, 111
Database financing
Biological database, policy, economic model, statistics, 717
Database searching
TargetFinder, annotated sequences, sequence database, transcription factors, binding sites, 172
Blocks, protein alignment, protein families, alignment databases, 471
FingerPRINTScan, algorithm, motif database, PRINTS database,
Caenorhabditis elegans, Saccharomyces cerevisiae, 799
Protein Data Bank, database analyses, 807
FramePlus, protein sequences, alignment algorithm, DNA alignment, SCOP, benchmarking, 867
IMPALA, matrix profiles, local alignments, protein sequence, 1000
Database sequences
database errors, vector contamination, database comparisons, 106
JaDis, nucleic acid sequences, sequence distance, genome evolution, 424
protein sequences, SWISS-PROT, associative database, data analysis, 741
Decision trees

© Oxford University Press 1999

secondary structure prediction, consensus, CoDe, machine learning, 1039

DIALIGN
sequence alignment, multiple alignment, segment-to-segment, weight function, 211

DIP
protein evolution, interfaces database, protein structure, molecular mimicry, 832

DINAMO
protein alignment, model building, visualization, interactive, 309

DNA binding
gene promoters, Rap1p, binding sites, Saccharomyces cerevisiae, ribosomal protein, protein genes, weight matrix, 267
transcription factor, binding sites, TFBIND, prediction, DNA interaction, 622

DNA database
nucleosomal DNA, binding site, DNA properties, DNA characteristics, 582

DNA melting
MELTSIM, statistical mechanics, simulation, polymeric DNA, melting curves, denaturation, 370

DNA probesets
ProbeDesigner, bDNA, NSH interactions, 348

DNA sequences
Hidden Markov models, yeast, genome, GC-content, algorithm, 980
SEGMENT, sequence composition, sequence domain, algorithm, 974
Complexity measure, ZivLempel, sequence structure, 994

DnaSP
molecular genetics, molecular evolution, population genetics, integrated software, 174

Dynamic programming
local alignments, sequence alignments, gap penalties, similarity, 455

E-CELL
whole-cell simulation, cell modelling, genome engineering, 72

EDITtoTREMBL
protein sequence, sequence annotation, automation, 219

Endocrine disruptor
receptor database, RDB, endocrine disruptor problem, 544

Entrez
Complete genomes, genome sequences, viruses, bacteria, yeast, 536

Escherichia coli genes
gene products, gene database, 860
hidden Markov models, transcription units, gene finding, 987

ESPript
multiple sequence, sequence alignments, postscript, visualization, 305

EST clusters
CRAWview, gene families, visualization, polymorphism, 376

Eukoryotic genomes
transcription factors, statistical analysis, binding site clusters, Saccharomyces cerevisiae, gene regulation, 776

Family pairwise search
protein families, homology, statistical models, motifs, 463

FingerPRINTScan
database searching, motif database, PRINTS database, Caenorhabditis elegans, Saccharomyces cerevisiae, 799

Fold recognition
threading algorithm, structure prediction, protein structure, 66
FORESST, secondary structure, protein folds, protein sequence, 131

FORESST
secondary structure, protein folds, protein sequence, fold recognition, 131

FramePlus
protein sequences, SCOP, database searching, benchmarking, DNA alignment, dynamic programming, 867

Functional annotation
automation, protein sequences, algorithm, TrEMBL, SWISS-PROT, 228

Functional relationship
multiple sequences, protein patterns, multiple alignment, DNA sequences, alignment matrix, statistical method, 563

Functional sites
oligonucleotide, MATRIX database, frequency matrix, DNA annotation, 631
transcription factors, binding sites, B-DNA-VIDEO, conformational properties, physicochemical properties, database, 654
ACTIVITY, binding sites, nucleotide sequence, correlation, protein interaction, database, 687

Gap penalties
local alignments, sequence alignments, gap penalties, dynamic programming, similarity, 455

GeneBuilder
gene structure, dynamic programming, prediction, model construction, 612

GeneExpress
integrated databases, gene expression, regulatory sequences, 669

Gene expression
Integrated databases, GeneExpress, regulatory sequences, 669

Gene families
CRAWview, visualization, EST clusters, polymorphism, 376
MULTICLUSTAL, automation, Clustal W, mutiple sequence alignments, 909

Gene finding
prokaryotic gene prediction, prokaryotic genomes, algorithm, multiple sequence alignment, 874
hidden Markov models, Escherichia coli genes, transcription units, 987

Gene prediction
prokaryotic gene prediction, prokaryotic genomes, algorithm, multiple sequence alignment, 887
AraSet, Arabidopsis thaliana, protein sequence, gene models, eukaryotic genome, genome annotation, 874

Gene promoters

Rap1p, binding sites, Saccharomyces cerevisiae, ribosomal protein, protein genes, weight matrix, 267

GeneNet
database, interactive, graphics, JAVA, 713

GeneQuiz
genome sequence, annotation, automation, protein sequences, 391

Gene structure
GeneBuilder, dynamic programming, prediction, model construction, 612

Gene network
morphogenesis, arabidopsis thaliana, gene expression, 593
GeneNet, database, interactive, graphics, JAVA, 713

Genetic simulation
Library, animal population, plant population, 85

Genetic sequences
complexity measure, ZivLempel, sequence structure, 994

Genome database
GOLD, genome database, genome projects, 773

Genome maps
Corba, IDL specification, standard interface, 157
genomic mapping, STS data, contigs, mapping data, 278

Genome sequence
GeneQuiz, genome sequence, annotation, automation, protein sequences, 391
DNA sequences, RegScan, eukaryotic genes, regulatory regions, 644

Genome annotation
GeneQuiz, genome sequence, automation, protein sequences, 391
AraSet, gene prediction, Arabidopsis thaliana, protein sequence, gene models, eukaryotic genome, 887

Genome comparison
microbial genomes, comparative analysis, automation, complete genomes, protein sequences, orthologs, 900

Genome rearrangement
gene families, simulation, algorithm, exemplar distance, 909

GOLD
genome database, genome projects, 773

HICLAS
taxonomic database, phylogenetic trees, taxon view, biological classification, 149

Hidden Markov models
yeast, genome, GC-content, algorithm, DNA sequences, 980
E.coli genes, transcription units, gene finding, 987

Hydrophobic cores
protein structure, wavelet analysis, prediction, 141
non-polar contacts, proteins, protein-protein contacts, clustering, crambin, 501

Hydrophobic ligands
Docking, FlexX, algorithm, 243

Imagene
genomic sequence analysis, sequence annotation, object-based model, microbial sequencing, integrated environment, 2

IMAGEne
cDNA clone, gene discovery, gene function, EST, cluster, 965

Immunogenetics
ontology, bioinformatics, IMGT-ONTOLOGY, 1047

IMPALA
Matrix profiles, protein sequence, local alignments, 1000

Interatomic contacts
automation, ligand-protein contacts, structural unit contacts, analysis, 327

Java
JaDis, nucleic acid sequences, sequence distance, genome evolution, 424
bioWidgets, genomics, JavaBean components, visualization, data interaction, 837

JaDis
nucleic acid sequences, sequence distance, genome evolution, 424

K-Estimator
nucleotide sequences, nucleotide substitutions, molecular evolution, 763

KIND
protein database, redundancy, 260

Long pairwise alignments
post-processing, algorithm, genome evolution, 1012

Lattice proteins
structure prediction, protein simulation, constraint programming, 234

LEADER_RNA
mRNA, translational properties, prediction, eukaryotic mRNA, 704

LIBRARY
Genetic simulation, plant population, animal population, 85

Markov chains
promoter regions, DNA segments, eukaryotes, encoding genes, 362

Markup Language
bipolymer database, markup language, 339

Matrix plots
MatrixPlot, sequence alignments, distance matrices, visualization, 769

MELTSIM
statistical mechanics, simulation, polymeric DNA, melting curves, denaturation, 370

Meta_A
sequence annotation, algorithm, SWISS-PROT, biological rule libraries, functional descriptors, 528

Metabolic networks
METATOOL, sugar metabolism, enzymes, 251

METATOOL
metabolic networks, sugar metabolism, enzymes, 251

MHC molecules
peptide binding, motifs, epitopes, discriminant analysis, 432

MIAH

sequence alignment, SSU rRNA, automation, 341

Microbial genomes
comparative analysis, automation, complete genomes, protein sequences, orthologs, 900

MODBASE
comparative protein structure models, database, annotated, 1060

Molecular docking
hydrophobic ligands, FlexX, algorithm, 243

Molecular evolution
DnaSP, molecular genetics, population genetics, integrated software, 174
K-Estimator, nucleotide sequences, nucleotide substitutions, 763

Molecular motors
binding protein, calmodulin, kinesin, myosin, plant motors, KCBP, sequence analysis, 1055

Molecular population genetics
DnaSP, integrated software, 174

Molecular structure
secondary structure, structure prediction, improvements, disjunctive constraints, 53

Morphogenesis
gene network, arabidopsis thaliana, gene expression, 593

Motor protein
binding protein, calmodulin, kinesin, myosin, plant motors, KCBP, sequence analysis,1055

Mouse genes
alternative transcripts, list, 170

mRNA
translational properties, prediction, LEADER_RNA, database, eukaryotic mRNA, 704

MULTICLUSTAL
automation, Clustal W, mutiple sequence alignments, 862

Multiple sequence alignments
ComAlign, improved alignment, simulated data, 122
segment-to segment, Generalized maximum trace, 203
DIALIGN, segment-to-segment, weight function, 211
ESPript, postscript, visualization, 305
DINAMO: model building, visualization, interactive, 309
multiple sequences, protein patterns, functional relationships, DNA sequences, alignment matrix, P value, statistical method, 563
MULTICLUSTAL, automation, Clustal W, 862
Protein families, optimal alignment, polynomial algorithm, convergence precedure, 947

Multivariate linear regression
secondary structure, protein structure, structure prediction, algorithm, accuracy, 413

Mutation database
MUTbase, database management, maintenance, 852

Mutational spectra
nucleotide sequences, regression trees, REGRT, 553

MUTbase
mutation databases, database management, maintenance, 852

Neural networks
consensus sequences, DNA sequences, accuracy, network topology, 723
protein secondary structure prediction, algorithm, multiple alignments, 937

Nucleosome DNA
binding site, DNA properties, nucleosomal database, DNA characteristics, 582

Oligonucleotide content
functional DNA sites, oligonucleotide, MATRIX database, frequency matrix, DNA annotation, 631

Ontology
TAMBIS, semantics, bioinformatics applications, 510
immunogenetics, bioinformatics, IMGT-ONTOLOGY, 1047

ORBIT
bioinformatics tools, client/server system, 847

ORF
ORFans, protein families, protein sequences, genomes, 759

Pedigrees
CoPE, epidemiologists, drawing, 345

Peptide binding
MHC molecules, motifs, epitopes, discriminant analysis, 432

PHYSEAN
Protein domains, amino acids, protein prediction, protein analysis, 1028

PIR-ALN
protein sequences, sequence alignments, alignment database, 382

Policy
Biological database, economic model, statistics, 717

PolLL promoters
promoter sequences, algorithm, protein-coding genes, 356

PredAcc
solvent accessibility, prediction. protein residues, amino acids, 176

ProbeDesigner
bDNA, NSH interactions, 348

Promotor modules
gene regulation, FastM, binding sites, ModelInspector, functional modules, detection, 180

Promoter regions
DNA segments, Markov chains, eukaryotic promotors, encoding genes, 362

Promoter sequences
PolII promoters, algorithm, protein-coding genes, 356

Promoter database
SCPD, Saccharomyces cerevisiae, binding sites, transcriptor factor, binding affinity, expression data, 607

Protein Analysis
protein sequence, protein structure, JAVA, 521
PHYSEAN, protein domains, amino acids, protein prediction, 1028

Protein Data Bank
database management, review, 807

Protein database
KIND, redundancy, 260

SYSTERS, protein sequence, 262
Blocks, protein families, alignment databases, database searching, 471
SECOST, protein modelling, database, amino acid residues, 525
protein sequences, SWISS-PROT, associative database, associative network, data analysis, 741
TargetDB, protein targeting, peptide database, subcellular targets, targeting sequences, 765

Protein domain-homologies
prediction, BLAST, 343

Protein family
Family pairwise search, algorithm, homology, statistical models, motifs, 463
Blocks, protein alignment, alignment databases, database searching, 471
protein databases, sequence similarity, structural similarity, comparisons, structural genomics, 480
ORFs, ORFans, protein sequences, genomes, 759
Rich Family Description, protein sequences, multiple alignments, 1020

Protein secondary structure prediction
lattice proteins, protein simulation, constraint programming, 234
algorithm, multivariate linear regression, prediction accuracy, 413
neural networks, prediction algorithm, multiple alignments, 937
consensus, decision trees, CoDe, machine learning, 1039

Protein evolution
DIP, homonyms, synonyms, interfaces database, protein structure, molecular mimicry, 832

Protein structure
non-polar contacts, protein-protein contacts, hydrophobic interactions, clustering, crambin, 501
protein sequence, Protein Analyst, protein analysis, JAVA, 521
MODBASE, comparative models, database, 1060

Protein topology database
TOPS, algorithm, protein structure, database searching, 317

Protein threading
SAUSAGE, protein alignments, force fields, 1064
Threadlize, protein family, visualization, 1062

Proteome
E,coli, gene products, gene database, 860

Radiation breaking
mammalian cells, monte carlo simulation, DNABreak, chromosome irradiation, polymer physics, 957

Rap 1p
gene promoters, binding sites, Saccharomyces cerevisiae, ribosomal protein, weight matrix, 267

Receptor database
RDB, endocrine disruptor problem, 544,

RegScan
DNA sequences, genomic sequences, eukaryotic genes, regulatory regions, 644

Relational database
TargetDB, protein targeting, peptide database, subcellular targets, targeting sequences, 765

Regression trees
nucleotide sequences, mutational spectra, REGRT, 553

RegScan
DNA sequences, genomic sequences, eukaryotic genes, regulatory regions, 644

REPuter
complete genomes, repeats, palindrones, 426

Rich Family Description
Protein sequences, multiple alignments, protein families, 1020

RNA fingerprinting
computer simulation, cDNA fragments, nucleotide databases, PCR-based, 93

RNA internal loops
RNA molecules, structure prediction, internal loops, algorithms, 440

RNA Movies
visualization, RNA secondary structure, animations, switching structure, 32

RNA secondary structure
RNA Movies, visualization, animations, switching structure, 32
vector method, visualization, VizQFolder, drawing, 286
RNA molecules, structure prediction, internal loops, algorithms, 440
RNA sequences, unaligned sequences, pseudoknots, consensus structure, tRNA, algorithm, prediction, 785

RNA structure prediction
Stem Trace, structure analysis, comparative analysis, visualization, HIV, interactive, 16
RNA molecules, internal loops, algorithms, 440
evolutionary history, algorithm, phylogenetic trees, 446

rRNA
MIAH, sequence alignment, SSU, automation, 341
prokaryotes, mRNA, base-pairing potentials, free-energy, ShineDalgarno sequence, 578

Saccharomyces cerevisiae
SCPD, promoter database, binding sites, transcriptor factor, binding affinity, expression data, 607

SAUSAGE
protein threading, protein alignments, force fields, 1064

SD sequence
prokaryotes, rRNA, mRNA, base-pairing potentials, free-energy, 578

SECOST
protein modelling, database, amino acid residues, 525

SEGMENT
Dna sequences, sequence domain, genome structure, sequence composition, algorithm, 974

Sequence alignment
Bayesian statistics, biopolymer models, dynamic programming, sequence segmentation, 38
Calign, cDNA, genomic DNA, gap penalties, 298
local alignments, gap penalties, dynamic programming, similarity, algorithm, 455

Sequence annotation
Imagene, genomic sequence analysis, object-based model, microbial sequencing, integrated environment, 2
protein sequence, automation, TrEMBL, 219

automation, functional annotation, protein sequences, TrEMBL, SWISS-PROT, 228
Meta_A, SWISS-PROT, evaluation, biological rule libraries, functional descriptors, 528

Sequence constraints
MatrixPlot, matrix plots, sequence alignments, visualization, 769

Sequence dissimilarity
transformation distances, algorithm, tobacco, sequence comparison, 194

Sequence processing
WebBLAST, sequence data, automation, 422
long pairwise alignments, post-processing, algorithm, genome evolution, 1012

Sequence relationships
Distance Geometry, 3-D visualization, protein sequences, 89

Sequence similarity
BLAST PRINTS, sequence analysis, 523
Shotgun, database search, BLAST, enzyme superfamily, evolutionary relationships, 729

Sequence shuffling
Shufflet, similarities, algorithm, 1058

Shotgun
database search, BLAST, enzyme superfamily, evolutionary relationships,
sequence similarity, 729

Shufflet
shuffling sequences, similarities, 1058

Solvent accessibility
PredAcc, prediction protein residues, amino acids, 176

SRS
CORBA, object server, CORBA interface, 333

Stem Trace
RNA structure, structure analysis, comparative analysis, visualization, HIV, interactive,16

STS
genomic mapping, contigs, mapping data, 278

Structural genomics
protein families, protein databases, sequence similarity, structural similarity, 480

Supercoiling
complete genomes, DNA folding, protein structure, bp oscillations, yeast, bacteria, archaea, sequence periodicities, 187

SWEET
carbohydrate sequence, 3-D model, polysaccharides, oligosaccharides, 767

Swissknife
SWISS-PROT, database management, parsing, 771

SWISS-PROT
TrEMBL, redundancy, 258
protein sequences, associative database, associative network, data analysis, 741
Swissknife, database management, parsing, 771
functional information, annotation, 1060

SYSTERS
protein sequence, protein database, 262

TAMBIS
ontology, semantics, bioinformatics applications, 510

TargetDB
protein targeting, peptide database, subcellular targets, targeting sequences, 765

TargetFinder
annotated sequences, sequence database, transcription factors, binding sites, database searching, 172

Threading algorithm
structure prediction, fold recognition, protein structure, 66

Threadlize
Protein family, visualization, threading results, 1062

Taxonomic database
HICLAS, phylogenetic trees, taxon view, biological classification, 149

Toolkit
bioWidgets, genomics, JavaBeans, visualization, data interaction, AnnotView, BlastView and AlignView, 837

TOPS
protein topology, protein structure, topology database, database searching, 317

Transcription factors
TargetFinder, annotated sequences, binding sites, database searching, 172
binding sites, TFBIND, DNA interaction, 622
binding sites, B-DNA-VIDEO, conformational properties, physicochemical properties, database, 654
eukarotic genomes, statistical analysis, binding site clusters, Saccharomyces cerevisiae, gene regulation, 776

TREML
EDITtoTREMBL, protein sequence, sequence annotation, automation, 219
SWISS_PROT, redundancy, 258

Triplet repeat disorders
Neurodegenerative disorders, DNA structure, bendability, nucleosome positioning, ZNF231, 918

Wavelet analyses
protein structure, hydophobic cores, prediction, 141

WebBLAST
data processing, sequence data, automation, 422

WebPHYLIP
phylogenetic analysis, interactive, 1068

Yeast
Hidden Markov models, yeast, genome, GC-content, algorithm, DNA sequences, 980
